Our **Strategy** is a consolidation of existing practice and activity as well as a documentation of our ambition for Community-led support, all of which is being driven by a comprehensive transformation and change programme.

We're calling it...

This strategy provides an over-arching framework which applies and clearly links to our existing strategies and policies and will drive and enable future strategies.

This strategy should be read alongside other key strategy documents which are organisation specific, for instance, our new Borough Plan as well as our Cheshire West Health and Care Partnership Place Plan which is our Health and Wellbeing Strategy.

Thriving Communities

Enabling Great Lives has been informed through engagement with key stakeholders, in particular our valued adult social care workforce.

We have also listened to what we have been told in recent engagement activity, including our Future of Adult Social Care Commission, to ensure maximum value is realised from our commitment to co-production.

We recognise that to **enable great lives** we not only have to support people to their maximum potential for independence, we also have to work alongside broader Council and Partner services to support the development and sustainability of our local Communities.

Only with **Thriving Communities** can we Enable Great Lives.

Delivering this aspiration is not just an Adult Social Care challenge but one that we commit to delivering across the wider Council and with all of our Health and Wellbeing partners and services.

How Adult Social Care supports...

Thriving Communities

Jason attends Vivo's services at Canal Street and has been taking part in WAVE, a new 12-week programme that helps people with learning disabilities and autism learn new skills so they can get ready for volunteering or employment.

After completing the programme with his friends, book worm Jason has started a work placement at Great Boughton Library in Chester, carrying out a number of different tasks to help the team.

Jason said...

I've really enjoyed it. I've been stamping the books, sorting them ready to go on the shelves and helping with printing.

I've been going there on Wednesdays and supporting my manager wherever I can.

A reading challenge is coming up soon so I've been busy getting the books together ready for that.

Paula, who has been leading a team of staff on the WAVE programme, added...

It's amazing to see Jason starting a job he was made for.

If you visit our services, you'll often see Jason reading his favourite books and working in a library is something he's always wanted to do.

On the WAVE programme, we've been helping the people we support on their journey to volunteering or employment, covering things like communication, customer service, dressing appropriately for the workplace, teamwork and much more.

The journey they've been on from the start to the finish of the programme has been wonderful as they've learned so much in that time.

All of the people we support on our programme have secured volunteering or employment so it's going to be fantastic to see how they continue to develop in the coming months.

We're looking forward to running more programmes for the people we support in the future as it's been a real success so far.

CASE STUDY

Adult Social Care is used to working under pressure. The level of demand for services and the complexity of need of the people who need care and support has continued to grow. The resources needed to continue delivering services in the way we have done to date simply cannot keep up.

We are proud of how we have supported the residents of Cheshire West to live independently and to thrive in their Communities since 2009 and we are committed to ensuring we continually push ourselves to improve outcomes for our residents.

The need is more, the challenge is more – and we have a plan to deliver more.

Our **Vision** for Adult Social Care in Cheshire West is:

To enable people who live within our communities to live great lives and to support our communities to thrive.

Direct Payments were put in place to support Dave to return home from a Residential Care placement.

The support put in place enabled John to be safe at home with his wife Sonia.

John and Sonia have been married for more than fifty years and have a loving and supportive family.

John was placed in a residential care home following a period in hospital, but was very unhappy and was trying to leave.

Working with the family a local carer was identified who could work in a flexible and responsive way with the family to support John’s return home.

A Direct Payment was set up to allow the family to direct the overnight and day support they needed to have John at home, and he needed less support as he was happy, settled and more comfortable in his own familiar home.

The carer has been supported to set up a micro-enterprise to do this work.

Sonia said:
It is brilliant to have John at home with me and for us both to have the assurance that he is safe.

We are supported in a way that suits our home life and we have the pleasure of a friendly and consistent face.

We are so pleased this flexible support was available to us.

Core Purpose

The **core purpose** which drives our Vision is:

To provide the **care and support** people need, in the place they call home, by a skilled and compassionate workforce. Our workforce work as **one team, putting what matters to people first.**

Quotes from **Ruvimbo**, a Cheshire West and Chester Social Worker

We're inspiring people to write their own stories in their own way and that in itself is a real privilege.

It's more than a vocation as you're fighting for something with purpose and that's what encourages me more than anything else.

Our role is about promoting people's wellbeing and we all want to work creatively and flexibly to make a positive change for them.

As soon as I started my journey with the Council, I felt like I was heard as I had people wanting to sit and listen to my ideas and different approaches. It's the first role I've had where I feel like I've truly been listened to.

I'm always trying to advocate for people to feel empowered to make their own decisions and be more independent.

It's all about how we can enhance services and make them more inclusive, trying to open the door for those who are from marginalised communities so they feel like they have representation and can access services.

How we will achieve our Purpose

We will achieve this through continuing to improve and adapt our ways of working. This means driving forward our Three Pillars for change which have been informed through recent consultation and co-production exercises as well as engagement with the workforce:

01

Developing **effective and impactful partnerships** based on trust, openness and clear communication with health providers, third sector organisations and those with lived experience where we are all aligned to common goals which strengthen communities.

Outcome Focused

02

Enabling the development, continued delivery and promotion of services which support people who wish to be **independent** for longer and empower people to live in the place they call **home**.

Community Assets

03

Listening and encouraging **good conversations** with people who currently, or may in the future, draw on care and support to understand what is important to them, build their confidence and support them to achieve their goals.

Strength-based

Through the delivery of

Enabling Great Lives

Cheshire West will continue to be a place where **people and communities thrive**.

Impactful Partnerships

Ensuring safety is a key priority of the CQC assurance Framework. Cheshire West and Chester has a well established Local Safeguarding Adults Board. The purpose of the Board is to help and safeguard adults with care and support needs. The Board is made up of representatives from local partners including the Council, Health, Police, Fire and the Third Sector.

“Our vision is to promote partnership working by working together to help people feel safe and free from abuse and neglect.” ‘Our mission is to put the adult at risk of abuse or neglect, at the heart of everything we do.

CHESHIRE WEST AND CHESTER LOCAL SAFEGUARDING ADULTS BOARD (LSAB)

CASE STUDY

The Boards Strategic Plan 2020-23 set out the priority areas over the last 3 years.

The impact so far:

- We are providing people with information about safeguarding in an accessible format so that they can understand forms of abuse and what they can do.
- We work closely with the Safeguarding Children's Partnership, Community Safety Partnership and the Domestic Abuse Board which has resulted in improved outcomes for service users through maximising the impact of resources and reduced duplication of work or missed opportunities.
- We offer a range of safeguarding training courses which has led to increased skills & knowledge for partners resulting in more effective safeguarding services and improved outcomes for service users, this has been demonstrated due to the number of increased safeguarding concerns.
- We continue to produce regular e-bulletins.

Empowering People

CASE STUDY

The Community Catalysts project aims to build on local people’s strengths, supporting them to start up their own community micro-enterprises offering care and support to other local people.

“I want to support as many people as possible to set up their own community micro-enterprises, creating a whole range of options so that people have control and a real choice over the support they draw on.

SONIA HOLDSWORTH | COMMUNITY CATALYSTS

Since launching in January, the project has already supported 34 community micro-enterprise leaders to get set up.

As well as helping people to set up new community micro-enterprises, we can also advise small groups and organisations already established who may be looking to diversify or extend what they offer.

Good Conversations

CASE STUDY

At Let's Talk everyone is welcome to drop-in for face-to-face advice about wellbeing support that is available in the local area, as well as for practical advice and guidance.

Available support:

- Access to community activities
- Advice on managing activities relating to daily living
- Advice about equipment, aids and adaptations
- Cost of living advice and support
- Advice on how to access support and activities to reduce social isolation and loneliness
- Carer support

There are currently five Let's Talk sites across the borough, which have been developed along with a range of partners and community organisations. Each site provides a warm welcome for residents who are facing challenging issues that are affecting their health and wellbeing.

People's health and wellbeing can be affected by lots of different issues including housing and financial challenges so visit a Let's Talk and start the conversation.

This strategy has been informed through insight from co- production and engagement activity undertaken by the Adult Social Care Directorate in the 12 months leading up to the Strategy publication.

You told us that **You Want...**

- *A person-centred approach to support that is flexible to changing needs and circumstances, particularly as people often don't fit neatly into predefined categories*
- *Us to listen and make 'nothing about us without us' real*
- *Opportunities for people with care and support needs who can't easily leave their home to socialise, get out and about and meet others*
- *Funding for local organisations who provide community led support*
- *More support for carers*
- *A local approach to the support we provide.*

We are committed to addressing this.

WE WILL

The 'wants' of people who draw on care and support have prompted discussion with the workforce on how we best meet these asks.

Our 'We will' Priority Commitments are...

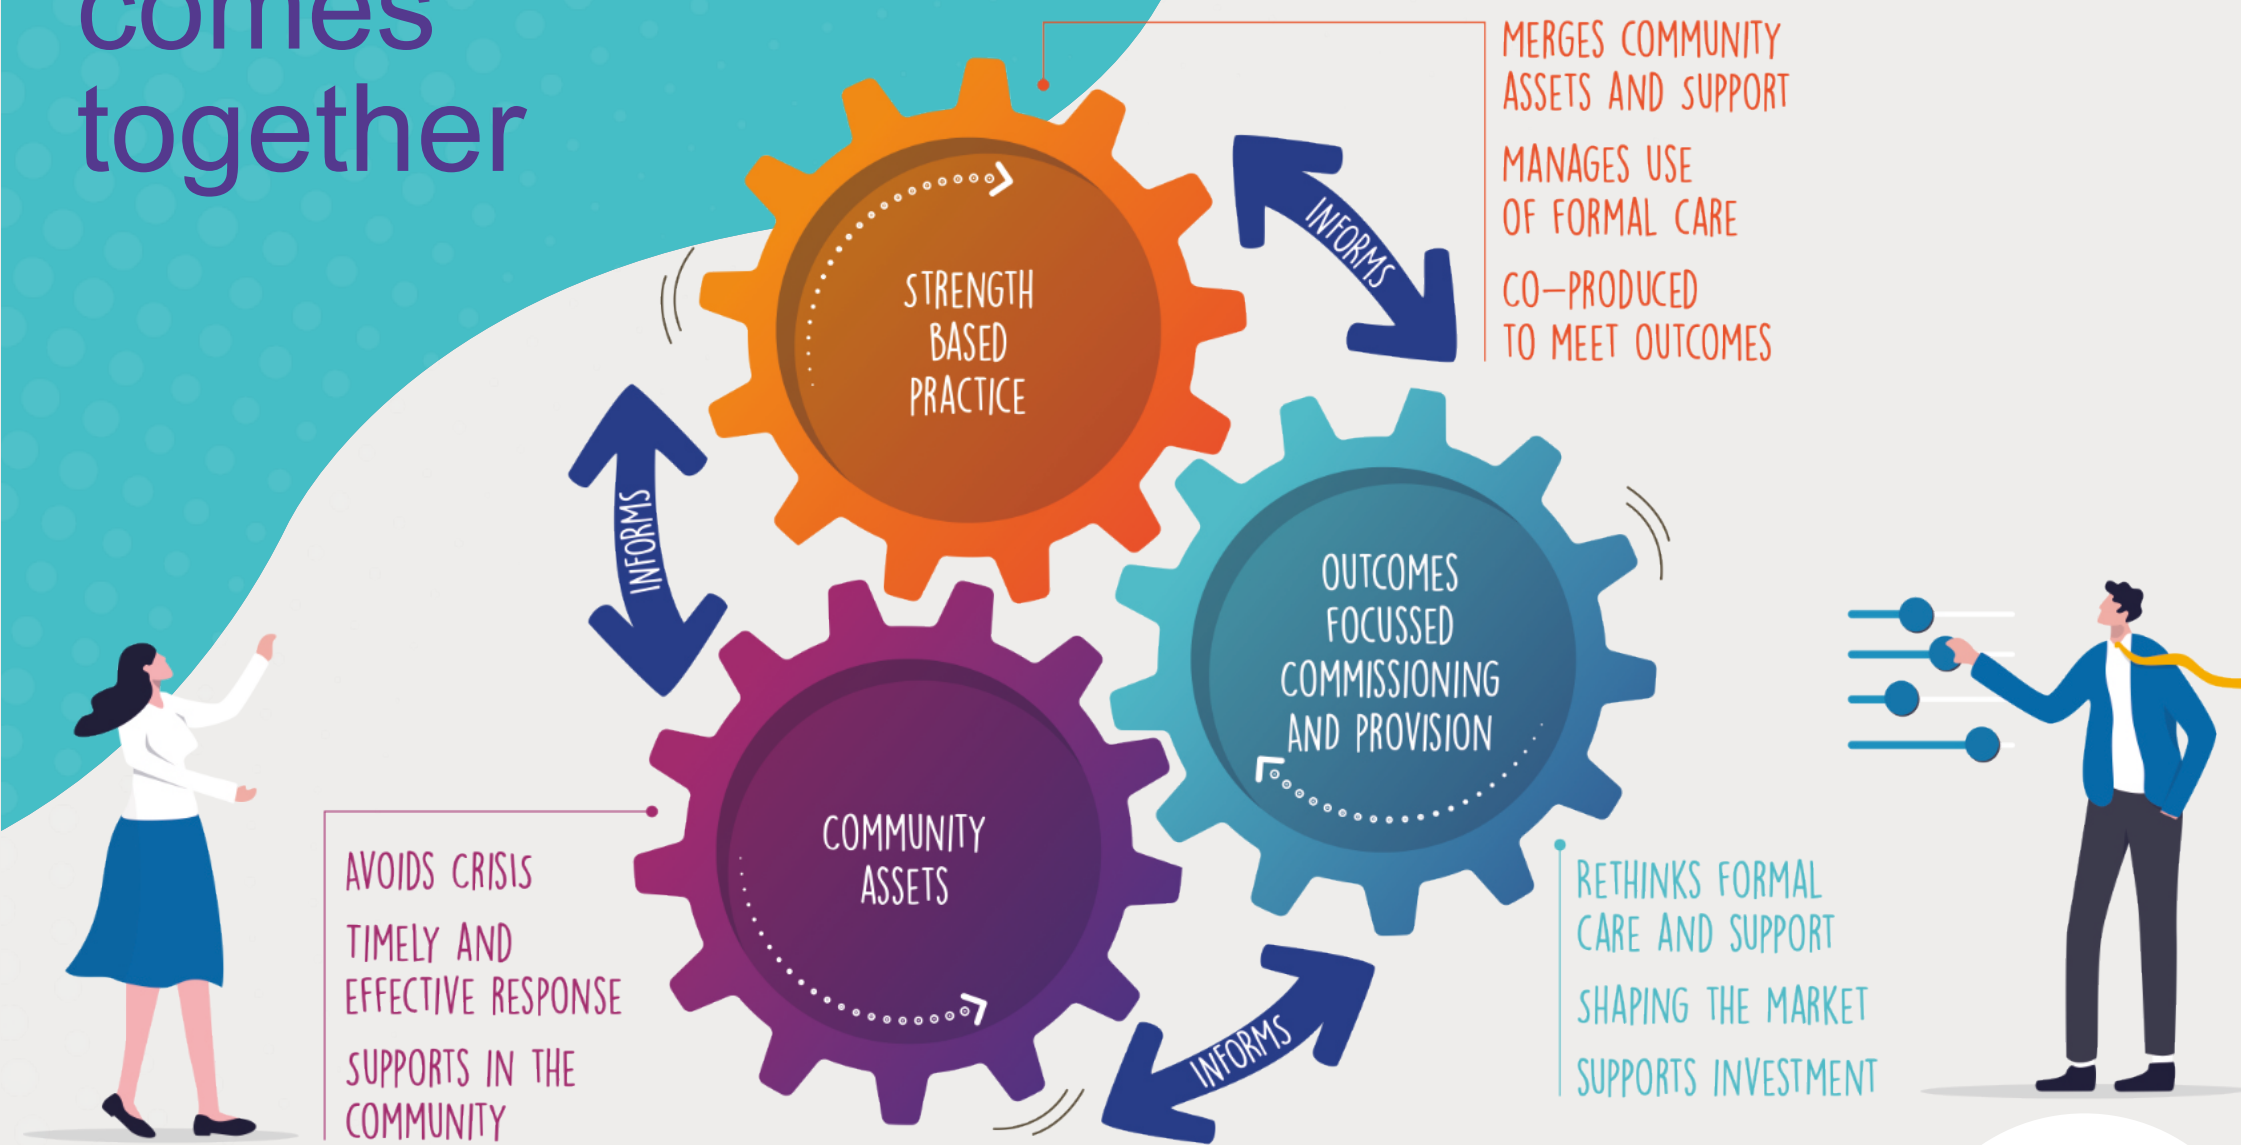

Collaborate:	We will work together to foster ideas and achieve a positive outcome
Connect Communities:	We will work with Partners to support the creation and signposting of connected and resilient communities
Focus on strengths:	We will promote independence
Move towards prevention:	We will work earlier to empower people
Co-Produce:	We will undertake meaningful and inclusive engagement
Support a Motivated Workforce:	We will support, listen to and engage a confident and committed workforce
Ensure Safe Practice:	We will ensure quality and safety in practice through training, support and leadership

Our Model

Our Vision, Purpose, Three Pillars for Change and our 'We will' Priority commitments are all embodied in our commitment to a **Community-Led Support** approach to our services.

How this comes together

How this will feel

Joseph's Story

I matter

Joseph is the 40 year old father and carer of his 18-year-old daughter who has a neuromuscular condition and additional educational needs. Joseph was becoming isolated and tired from the constant care he was providing for his daughter. The NeuroMuscular Centre introduced Joseph to the NMC shed club, which he now attends on a regular basis enabling him to use his skills and learn new skills from other club members. Joseph has been able to be involved with a group of peers who understand the restrictions on his lifestyle, giving him support and a sense of purpose.

'I have gained confidence in my abilities and feel more able to face and support the many challenges which my daughter faces as she approaches adulthood.'

Janey's Story

I am in control

Janey was sleeping rough and using alcohol and other substances. Her social worker built a trusting relationship with her over a year and linked her up with mental health and other community supports that moved at Janey's pace and allowed for her to experience progress and setbacks in a safer way. The social worker engaged with appropriate partner agencies to build support and choices for Janey. These small steps led to Janey wanting to move into stable accommodation, a flat was identified that had a supportive approach. Janey has kept her tenancy for many months and is using the community supports that she chooses.

'I was treated as an individual and allowed to choose the support that worked best for me and the life I want to live.'

Isaac's Story

I am supported

Isaac contacted social care as he was missing company, a referral was sent to pathfinder for social groups in the Neston area and he was directed towards Let's Talk. The following was set up:

- A private cleaner
- Directed to the Cyber Café at the methodist Church for I.T support on how to use his laptop
- Joined Photography sessions at the methodist Church (a previous hobby)
- Directed to the Living Well bus the following week for his covid and flu vaccinations

Isaac now pops into Let's Talk every other week to have a chat and a cup of tea.

'The people at Let's Talk are great for helping me know about activities and support in my local area.'

Our Impact

These measures intend to assess the strategic success in delivery of the strategy

01

1. **Our Cheshire West Place Partnership** is operating effectively across current and proposed areas of integration
2. **Equal voice** of Partners is maintained in decision-making
3. **We co-produce** and codesign, listening to the voice of people with lived experience
4. **Joint Strategies** are in place across key areas of focus and are regularly reviewed

Outcome Focused

02

1. **Home First** (enabling people to be independent in the place they call home) is a priority of all Partners
2. **Commissioning Intentions** support the strengthening of community-based provision
3. **Information** is accessible to the public, commissioners & partners to support sign-posting & access to community provision

Community Assets

03

1. **Community-led Support** is embedded as an approach across the council and partners
2. **Communication and support** is consistently provided to support and enable 'good conversations'
3. **Prevention and early-intervention** are key areas of focus for Adult Social Care and partners

Strength-based

Data is collated and reviewed across health and care on a daily basis to ensure effectiveness of service delivery
