1.0. **Definitions**

1.1. "Caravan" has the meaning assigned to it under the terms of The Caravan Sites and Control of Development Act 1960 Section 29(1).

1.2. "Twin Unit" has the meaning assigned to it under the terms of the Caravan Sites Act 1968 Section 13(1).

1.3. Throughout the ‘Site Licence Conditions’ “caravan” and “caravan site” are used in general terms, to include what are usually referred to as mobile homes and mobile home parks. “Unit” also refers to the legal definition of a caravan.

1.4. Gypsy and Traveller sites are designed to provide land per household which is suitable for a mobile home, touring caravan and a utility building, together with space for parking.

1.5. Permanent Sites are defined as providing residents with a permanent home.

1.6. Transit Sites are defined as permanent sites used to provide only temporary accommodation for their residents. Lengths of stay can vary but are usually set at between 28 days and three months. These site conditions apply to both types of sites.

1.7. “Licensing Authority” is used throughout the ‘Site Licence Conditions’ and refers to the Local Authority or any successors thereafter.

2.0. **The Boundaries and Plan of the Site**

2.1. The boundaries of the site from any adjoining land shall be clearly marked by a man made or natural feature and be maintained.

2.2. On all new sites no caravan or combustible structure shall be positioned within 3 metres of the boundary of the site.

2.3. All pitches shall be clearly defined.

2.4. A plan of the site shall be supplied to the Licensing Authority upon the application for a licence and, thereafter whenever there is a material change to the boundaries or layout of the site, or at any other time on the demand of the Licensing Authority.

2.5. The plan supplied must clearly illustrate the layout of the site including all relevant structures, features and facilities on it and shall be of suitable
quality.

3.0. **Density, Spacing and Parking between Caravans**

3.1. The density of caravans on a site shall be determined in accordance with relevant health and safety standards and fire risk assessments. The density of caravans on the site must be approved in writing by the Licensing Authority.

3.2. On all new sites no caravan shall be stationed within two metres of any road or communal car park within the site or more than 50 metres from such a road within the site.

3.3. Every caravan, trailer or Park Home must not be less than six metres from any other caravan, trailer or Park Home that is occupied separately.

3.4. No structure other than those required for compliance with Licence Conditions shall be erected on site without the approval of the Licensing Authority.

3.5. A shed, covered storage space or amenity building should be permitted between units only if it is of a robust and non-combustible construction (including non-combustible roof) and sufficient space is maintained around each unit so as not to prejudice means of escape in case of fire. Windows in such structures should not face towards the units on either side.

3.6. Private cars may be parked between adjoining caravans on a suitable surfaced base provided that the door to the caravan is not obstructed. A three metre clear space must be kept between the vehicle and adjacent caravans in separate ownership and any vehicle associated with adjacent caravans in separate ownership.

3.7. Plastic or wooden boats, other touring caravans and large / high-sided domestic or commercial vehicles shall not be parked between units.

3.8. On existing sites where a fire bridge is likely to be caused and on all new sites fences and hedges, where allowed and forming the boundary between adjacent caravans, should be a maximum of one metre high.
4.0. **Roads, Gateways and Overhead Cables**

4.1. Roads shall be designed to provide adequate access for emergency vehicles and routes within the site for such vehicles must be kept clear of obstruction at all times.

4.2. New roads shall be constructed and laid of suitable bitumen macadam or concrete with a suitable compacted base.

4.3. All roads shall have adequate surface water/storm drainage.

4.4. New two way roads shall not be less than 3.7 metres wide, or if they are designed for and used by one way traffic, not less than three metres wide.

4.5. One-way systems shall be clearly signposted.

4.6. Where existing two way roads are not 3.7 metres wide, passing places shall be provided.

4.7. Vehicular access and all gateways to the site must be a minimum of 3.1 metres wide and have a minimum height clearance of 3.7 metres.

4.8. Roads shall be maintained in a good condition.

4.9. Cable overhangs must meet the statutory requirements.

5.0. **Footpaths and Pavements**

5.1. Every caravan shall be connected to a road by a footpath with a hard surface which shall be maintained in good condition.

5.2. Communal footpaths and pavements shall not be less than 0.9 metres wide.

6.0. **Lighting**

6.1. Roads, communal footpaths and pavements shall be adequately lit between dusk and dawn to allow the safe movement of pedestrians and vehicles around the site during the hours of darkness.
7.0. **Bases**

7.1. Every unit must stand on a concrete base or hard-standing.

7.2. The base must extend over the whole area occupied by the pitch, and must project a sufficient distance outwards from its entrance or entrances to enable occupants to enter and leave safely. The hard standings must be constructed to the industry guidance, current at the time of siting, taking into account local conditions for example, ground conditions and drainage.

8.0. **Maintenance of Common Areas, including Grass, Vegetation and Trees**

8.1. Every part of the site to which the public have access shall be kept in a clean and tidy condition.

8.2. Every road, communal footpath and pavement on the site shall be maintained in a good condition, good repair and clear of rubbish.

8.3. Grass and vegetation shall be cut and removed at frequent and regular intervals in order to comply with 8.1.

8.4. Trees within the site shall (subject to the necessary consents) be maintained.

8.5. Any cuttings, litter or waste shall be removed from the immediate surrounds of a pitch.

8.6. The space beneath and between caravans shall not be used for the storage of combustible materials.

9.0. **Supply and Storage of Gas**

9.1. Gas (including natural gas) and oil installations, and the storage of supplies shall meet current statutory requirements, relevant Standards and Codes of Practice (see Appendix 2).

9.2. Liquefied Petroleum Gas cylinders must not be positioned or secured in such a way as to impede access or removal in the event of an emergency.
10.0. Oil Fired Central Heating

10.1. Installations for oil fired central heating should meet Part L of the Building Regulations 2007 together with appropriate storage and safety arrangements in case of oil leaks.

11.0. Electrical Installations

11.1. On the site there shall be installed an electricity network of adequate capacity to meet safely all reasonable demands of the caravans and other facilities and services within it.

11.2. The electrical network installations shall be subject to regulation under current relevant legislation and must be designed, installed, tested, inspected and maintained in accordance with the provisions of the current relevant statutory requirements (see Appendix 2).

11.3. Any work on electrical installations and appliances shall be carried out only by persons who are competent to do the particular type of work being undertaken, in accordance with current relevant statutory requirements.

11.4. Any work on the electrical network within the site shall be done by a competent person fully conversant with the appropriate statutory requirements.

11.5. If an inspection reveals that an installation no longer complies with the regulations extant at the time it was first installed, any deficiencies shall be rectified. Any major alterations and extensions to an installation and all parts of the existing installation affected by them shall comply with the latest Regulations.

12.0. Water Supply

12.1. All pitches on the site shall be provided with a water supply sufficient in all respects to meet all reasonable demands of the caravans situated on them.

12.2. All new water supplies shall be in accordance with all current legislation, regulations and relevant British or European Standards.

12.3. All repairs and improvements to water supplies and installations shall be carried out to conform with current legislation and British or European
Standards.

12.4. Work on water supplies and installations shall be carried out only by persons who are qualified in the particular type of work being undertaken and in accordance with current relevant legislation and British or European Standards.

13.0. Drainage and Sanitation

13.1. Surface water drainage shall be provided to avoid standing pools of water.

13.2. There shall be satisfactory provision for foul and waste water drainage either by connection to a public sewer or sewage treatment works or by discharge to a properly constructed septic tank or cesspool approved by the Licensing Authority.

13.3. All drainage and sanitation provision shall be in accordance with all current legislation and British or European Standards.

13.4. Work on drains and sewers shall be carried out only by persons who are qualified in the particular type of work being undertaken and in accordance with current legislation and British or European standards.

13.5. Properly designed disposal points for the contents of chemical closets should be provided. These will require an adequate supply of water for cleaning the containers.

14.0. Washing Facilities

14.1. For caravans without their own water supply and water closets, communal toilet blocks shall be provided, with adequate supplies of hot and cold water. The tables below indicate the minimum requirements.

<table>
<thead>
<tr>
<th></th>
<th>Men</th>
<th>Women</th>

</tr>
</tbody>
</table>

14.2. Facilities for sanitary towel disposal must be provided in the women’s toilet.

14.3. There should be sufficient space in each shower compartment to enable clothing to be stored and kept dry.

14.4. Disabled facilities must be provided when renovating or constructing new toilet facilities on site in line with the Disability Discrimination Act 1995. They may be unisex and must include a WC, wash hand basin and level access shower. The disabled room should also provide baby changing facilities.

14.5. Toilet blocks should be situated so that all site occupants may have reasonable access by means of a suitable road or footpath. Toilet blocks must be kept clean, in good repair and have adequate artificial lighting.

14.6. For caravans without their own sinks the following facilities must be provided:

15.0. Amenity Buildings

15.1. New guidelines issued by Communities and Local Government (Designing Gypsy and Traveller Sites – Good Practice Guide, May 2008) have recommended that each family pitch have the following facilities.
One amenity building per pitch including: hot and cold water supply, electricity supply, a separate toilet and hand wash basin, a bath/shower room, a kitchen and dining room. The access to the toilet should be through a lobbied area or separate access direct from the pitch.

Provision of a day/living room and store room is recommended.

All new sites shall be designed to meet this standard.

For further guidance see the guidance document mentioned above.

15.2. A program for upgrading the facilities on site (where it is feasible to do so) should be discussed with the Licensing Authority to ensure Gypsy and Travellers enjoy the same standards as other sectors in the community.

16.0. **Domestic Refuse Storage and Disposal**

16.1. Where communal refuse bins are provided these shall be non-combustible and housed within a properly constructed bin store.

16.2. All refuse disposal shall be in accordance with all current legislation and regulations.

17.0. **Communal Vehicular Parking**

17.1. All new parking spaces shall be constructed and laid of suitable bitumen macadam or concrete with a suitable compacted base to meet the requirements of the residents and their visitors.

18.0. **Communal Recreational Space**

18.1. On sites where it is practical and necessary to do so, suitable space equivalent to about one tenth of the total area of the site shall be allocated for recreational purposes, unless in the Licensing Authority’s written opinion there are adequate recreational facilities within a close proximity to the site.

19.0. **Notices and Information**

19.1. The name of the site shall be displayed on a sign in a prominent position at the entrances to the site together with the current name, address and telephone number of the licence holder, manager and emergency contact
details.

19.2. A notice board will be provided on site in an easily accessible location and display the following information:

- A current plan of the site with roads and pitches marked on it.
- A copy of the current site licence and conditions.
- A copy of the most recent periodic electrical inspection report.
- A copy of the site owner’s certificate of public liability insurance.
- A copy of the local flood warning system and evacuation procedures, if appropriate.
- A copy of the fire risk assessment made for the site.

19.3. All notices shall be suitably protected from the weather and from direct sunlight.

20.0. Flooding

20.1. The site owner shall establish whether the site is at risk from flooding by referring to the Environment Agency’s Flood Map.

20.2. Where there is risk from flooding the site owner shall consult the Environment Agency for advice on the likelihood of flooding, the depths and velocities that might be expected, the availability of a warning service and on what appropriate measures to take.

21.0. Requirements to Comply with the Regulatory Reform (Fire Safety) Order 2005

21.1. The site owner shall make available the latest version of the fire risk assessment carried out under the Regulatory Reform (Fire Safety) Order 2005 for inspection by residents and when demanded, a copy of the risk assessment shall be made available to the local authority.

21.3. General fire safety principles to aid the site owner in conducting a risk assessment can be found in Appendix 3.
Appendix 1 – Contact Points for Regulatory Bodies and Guidelines

Roads, Gateways and Overhead Cables

Cable overhangs are regulated under the Electrical Safety Quality & Continuity Regulations 2002 SI 2002/2665. For further information contact the Health and Safety Executive (HSE). Contact details are:

- **Health and Safety Executive: Infoline**
  - Caerphilly Business Park
  - Caerphilly
  - CF83 3GG
  - Tel: 0845 345 0055
  - Email: infoline@natbrit.com
  - Website: www.hse.gov.uk

### Bases

Current industry guidelines are issued by the National Park Homes Council and the British Holiday and Home Park Association. Contact details are:

### Supply and Storage of Gas

Further information and guidance on gas installations can be obtained from the HSE. There is also a trade body for LPG supplies of which contact details are provided below. A certification scheme is also in operation to ensure persons carrying out works on gas installations are suitably qualified. The certification scheme can be found on the Communities and Local Government website at [www.communties.gov.uk](http://www.communties.gov.uk)
Electrical Installations

The HSE website contains information on the electricity legislation which may well apply.

A suitably qualified person may be one of the following:
1. A professionally qualified electrical engineer
2. Member of the Electrical Contractors Association (ECA)
3. A contractor approved by the National Inspection Council for Electrical Installation Contractor (NICEIC).

Water Supply

OFWAT provides service standards for water suppliers. There are also a number of schemes for suitably qualified persons the most popular of these being NIC qualifications. Contact details for these are below:
Drainage and Sanitation

OFWAT provides codes of practice for sewerage facilities. The Environment Agency also regulate the environmental quality of drainage.

Flooding

The Environment Agency provide information on areas which are at risk of flooding and can provide advice and assistance.

Fire Safety Measures

The Department for Communities and Local Government have information on the Fire Safety Order and guidance documents can be downloaded from their website at www.communities.gov.uk.
The Local Fire and Rescue Service have a duty to provide advice to those who ask for it, although they will not carry out any risk assessments.

Tel: 01606 868700
Email: feedback@cheshirefire.gov.uk Website: www.cheshirefire.gov.uk
Appendix 2 – Fire Safety Measures – further guidance

The information provided below is guidance aimed at supporting site owners in undertaking their fire risk assessments as required under the Regulatory Reform (Fire Safety) Order 2005. Please note the information provided is done so in good faith. Site owners should ensure that their sites are compliance and take their own expert advice where necessary. The Council will not be liable under any circumstances for any losses or damages of any kind in connection with use of the guidance provided.

Fire Points

These shall be located so that no caravan or site building is more than 30 metres from a fire point. Equipment provided at a fire point shall be housed in a weather-proof structure, easily accessible and clearly and conspicuously marked “Fire Point”.

Fire Fighting Equipment

Where water standpipes are provided:

- The water supply shall be of sufficient pressure to project a jet of water not less than five metres from the nozzle.

- There shall be a reel that complies with the current British or European Standard, with a hose not less than 35 metres long, having a means of connection to a water standpipe (preferably a screw thread connection) with a water supply of sufficient pressure and terminating in a small hand nozzle.

- Hoses shall be housed in a red box and marked “Hose Reel”. Access to the fire point shall not be obstructed or obscured.

Where hydrants are provided, hydrants shall conform to the current British or European Standard.

Access to hydrants and other water supplies shall not be obstructed or obscured.

Where standpipes are not provided or the water pressure or flow is not sufficient, each fire point shall be provided with multi-use extinguishers (two by nine litres) which comply with the current British or European Standard.
Fire Warning

A suitable means of raising the alarm in the event of a fire shall be provided at each fire point for example: a triangle, sounder or alarm.

Maintenance and Testing of Fire Fighting Equipment

- All alarm and fire fighting equipment shall be installed, tested and maintained in working order by persons who are qualified in the particular type of work being undertaken and be available for inspection by, or on behalf of, the licensing authority or the Fire and Rescue Service.

- A record shall be kept of all testing and remedial action taken.

- All equipment susceptible to damage by frost shall be suitably protected.

Fire Notices

A clearly written and conspicuous notice shall be provided and maintained at each fire point to indicate the action to be taken in case of fire. This notice should include the following:

“On discovering a fire:

- Ensure the caravan or site building involved is evacuated.

- Raise the alarm.

- Call the fire brigade”
